General Tips for an Emergency

Before an emergency

- Be prepared for an emergency before it happens.
- Make sure you have extra food and bottled water in a safe place.
- Make sure you have extra blankets if needed.
- Make sure you have a flashlight and portable radio with good batteries.
- Make sure you have your list of emergency phone numbers.
- Make sure you have at least 1 phone in the house that does not require electricity to work in case the power is out.
- Have a pre-determined place for the family to meet during an emergency, this will make it easier to make sure everyone is safe.

If you have a fire,

- Get out of the house or structure. If you have other family members try and make sure they are out. Meet at a pre-determined location agreed on by your family during any emergency.
- Remember to have enough clothing on if possible to protect you from the weather whatever the conditions.
- Call 911 for help.
- If you use oxygen, take your portable with you if possible.
- Call National Home Health Care if you need emergency oxygen.

If the electricity goes out

- Make sure you have plenty of blankets to keep you warm until the power comes back on.
- Make sure you have some food and water.
- If you use oxygen make sure you have plenty on hand. If not, call National Home Health Care and let them know you need additional oxygen and your power is out.
- If you have a portable radio listen to 710AM KGNC for emergency information, this is the official Emergency Broadcast Station for the Panhandle area.

If you have a weather emergency

- Follow all the tips in the above section “Before an Emergency”
- Make sure you monitor TV or your local radio station for weather warnings.
- Make sure you understand how the weather warning will affect you at your location.
- If you are an oxygen patient make sure you have your portable oxygen system ready to go with you if you need to take shelter or change your location.
